Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-14, drawn to a bipolar interconnection plate, classified in class 429, subclass 34.
- II. Claims 15-18, drawn to a method of making a bipolar interconnection plate, classified in class 29, subclass 623.1.

2. The inventions are distinct, each from the other because of the following reasons: Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product as claimed could be made by another materially different method such as without the use of an epoxy and by the use of a mechanical drill to form the bore.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their different classification recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 1745

4. A telephone call was made to Brian Pollack on October 3, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
